

## **Riga Technical University Open Access Policy**

The Riga Technical University Open Access Mandate was ratified by the Vice-Rector for Research on 10 December, 2012.

The mandate requires that all members of staff employed by Riga Technical University deposit their research publications (journal articles, conference proceedings, book chapters and similar material) in the RTU Publication Register ORTUS as soon as possible after they are published and in compliance with the copyright agreement.

1. All peer reviewed, published journal articles, conference proceedings, book chapters and similar material, where copyright allows, should be deposited in an open-access form in the RTU Publication Register (ORTUS) - a closed repository for use only within the RTU and an internal University tool for research output management.
2. All peer reviewed, published journal articles, conference proceedings, book chapters and similar material, where copyright allows, should be made available in an open-access form upon publication in the RTU Open Access Repository - a public open access repository, making content available through global searching mechanisms. Where a publisher has placed an embargo on making an item openly available, the item will not be made publicly visible until the embargo period has expired.
3. Where available, researchers should take advantage of opportunities to publish their work in an open-access form offered by journal publishers, and can apply for research grants in order to pay open-access publication fees.
4. All successful candidates for doctoral degrees are required to submit an electronic copy of their thesis to the University and are encouraged to make it available in the RTU Open Access Repository.
